ElectroLips LLC

Berkeley, California

Emails hacked, sites hacked, and I've never received one telephone call about any of this. Oh and work from anyone about my "secra-wife" idea for adults. Very hard dealing with the retarded in government. Do I need to serve with the incompetence procedure?

I recently tried contacting science journals to start reporting the trillions of dollars a year that are being stolen from the American economy through me and a few hundred inventions stolen and being used to fund genocidal caste system organizations here in the USA and controlled by foreign caste system and royalty. My computer was them hacked again and now my wifi isn't working anywhere on my laptop after tons of other hacks and theft by the caste system and occult members I know personally for decades in Palm Beach, Los Angeles and San Francisco. I have had 6 federal court cases shut down illegally on me by this pre orchestrated bipolar political scam on our nation. My biological family in the Colombo family and their associates at Mar a Lago and hollywood have been stealing hundreds of my inventions with the silicon valley bunch. They keep sending our money out of the country and killing our people here. I just had two federal cases dismissed against the DOJ and DOS for covering up a jihadist attack on me in Paris France and hundreds of other provable crimes by these liars with proof. 18 designs for power generation equipment levitating on magnets were stolen from me and anti caste system Americans and our economy. They spin all day with external force or with magnetic positioning. These dirt against caste system members in the USA federal government defrauded the USA by trillions of dollars a year in profits alone. Not to mention hundreds of other inventions that have been suppressed for a large variety of industry. We are also being robbed by Eastern European people because I used an Eastern European patent office for some inventions. And the USA federal redcoats are stealing those from us through lawyers and other government people in Slovenia. We are being attacked everyday by caste system and royalty.
